Discourse Analysis introduces students to the major concepts and questions in Discourse Studies and their applications to language education. Each chapter draws on key research to examine critically a particular approach in the field, providing a review of important literature, examples to illustrate the principal issues concerned and an outline of the implications for their application to pedagogy. Features include: coverage of a broad range of approaches in the field, including Systemic Functional Linguistics and Register, Speech Acts, the Cooperative Principle and Politeness, Conversation Analysis, Genre Analysis, Critical Discourse Analysis and Corpus Linguistics. Discourse examples that include casual conversation, newspapers, fiction, radio, classrooms, blogs and real-life learner texts a selection of illustrations and tables carefully chosen to enhance students' understanding of different concepts and approaches. Discourse in English Language Education richly demonstrates how Discourse Studies can inform the teaching of English and other languages, both as a foreign language and in the mother tongue. It will be essential reading for upper undergraduates and postgraduates with interests in Applied Linguistics, TESOL and Language Education.

The Routledge Handbook of Teaching English to Young Learners

Discourse analysis is a term that has come to have different interpretations for scholars working in different disciplines. For a sociolinguist, it is concerned mainly with the structure of social interaction manifested in conversation; for a psycholinguist, it is primarily concerned with the nature of comprehension of short
written texts; for the computational linguist, it is concerned with producing operational models of text-understanding within highly limited contexts. In this textbook, first published in 1983, the authors provide an extensive overview of the many and diverse approaches to the study of discourse, but base their own approach centrally on the discipline which, to varying degrees, is common to them all - linguistics. Using a methodology which has much in common with descriptive linguistics, they offer a lucid and wide-ranging account of how forms of language are used in communication. Their principal concern is to examine how any language produced by man, whether spoken or written, is used to communicate for a purpose in a context.

**Multiple Voices in Academic and Professional Discourse**

Discourse analysis considers how language, both spoken and written, enacts social and cultural perspectives and identities. Assuming no prior knowledge of linguistics, An Introduction to Discourse Analysis examines the field and presents James Paul Gee’s unique integrated approach which incorporates both a theory of language-in-use and a method of research. An Introduction to Discourse Analysis can be used as a stand-alone textbook or ideally used in conjunction with the practical companion title How to do Discourse Analysis: A Toolkit. Together they provide the complete resource for students studying discourse analysis. Updated throughout, the fourth edition of this seminal textbook also includes two new chapters: ‘What is Discourse?’ to further understanding of the topic, as well as a new concluding section. A new companion website www.routledge.com/cw/gee features a frequently asked questions section, additional tasks to support understanding, a glossary and free access to journal articles by James Paul Gee. Clearly structured and written in a highly accessible style, An Introduction to Discourse Analysis includes perspectives from a variety of approaches and disciplines, including applied linguistics, education, psychology, anthropology and communication to help students and scholars from a range of backgrounds to formulate their own views on discourse and engage in their own discourse analysis. This is an essential textbook for all advanced undergraduate and postgraduate students of discourse analysis.

**Discourse Analysis and Second Language Teaching**

Accessible yet theoretically rich, this landmark text introduces key concepts and issues in critical discourse analysis and situates these within the field of educational research. The book invites readers to consider the theories and methods of three major traditions in critical discourse studies – discourse analysis, critical discourse analysis, and multimodal discourse analysis -- through the empirical work of leading scholars in the field. Beyond providing a useful overview, it contextualizes CDA in a wide range of learning environments and identifies how CDA can shed new insights on learning and social change. Detailed analytic procedures are included – to demystify the process of conducting CDA, to invite conversations about issues of trustworthiness of interpretations and their value to educational contexts, and to encourage researchers to build on the scholarship in critical discourse studies. This edition features a new structure; a touchstone chapter in each section by a recognized expert (Gee, Fairclough, Kress); and a stronger international focus on both theories and methods. NEW! **How to do Discourse Analysis**

In this challenging and at times controversial book, Ronald Carter addresses the discourse of ‘English’ as a subject of teaching and learning. Among the key topics investigated are: * grammar * correctness and standard English * critical language awareness and literacy * language and creativity * the methodological integration of language and literature in the curriculum * discourse theory and textual interpretation. Investigating English Discourse is a collection of revised, re-edited and newly written papers which contain extensive contrastive analyses of different styles of international English. These range from casual conversation to advertisement, poetry, jokes, metaphor, stories by canonical writers, public notices and
children's writing. Ronald Carter highlights key issues for the study and teaching of 'English' for the year 2000 and beyond, focusing in particular on its political and ideological inflections. Investigating English Discourse is of relevance to teachers and students and researchers in the fields of discourse analysis, English as a first, second and foreign language, language and education, applied and literary linguistics.

**Discourse Analysis**

This book’s innovative approach proposes Language for Teaching Purposes as a distinct field of enquiry and practice within Language for Specific Purposes. It uses robust theoretical and empirical evidence to demonstrate the specificity of language used by teachers teaching language, and the complex decisions teachers make around language choice and use in language classrooms. These complexities are shown to affect Non-native Speaker Language Teachers in particular so that their language needs must be met in teacher training programmes. Set in the Anglophone foreign language teaching world, this book will appeal to anyone involved in teacher training, language teaching or the investigation of classroom discourse.

**Discourse Analysis of Languaging and Literacy Events in Educational Settings**

This bestselling textbook is the ideal companion to *An Introduction to Discourse Analysis: Theory and Method*, by leading author, James Paul Gee. Using a practical how-to approach, Gee provides the tools necessary to work with discourse analysis, with engaging step-by-step tasks featured throughout the book. Each tool is clearly explained, along with guidance on how to use it, and authentic data is provided for readers to practice using the tools. Readers from all fields will gain both a practical and theoretical background in how to do discourse analysis and knowledge of discourse analysis as a distinctive research methodology. Updated throughout, this second edition also includes a new tool - ‘The Big C Conversation Tool’. A new companion website www.routledge.com/cw/gee features a frequently asked questions section, additional tasks to support understanding, a glossary and free access to journal articles by James Paul Gee. *How to do Discourse Analysis: A Toolkit* is an essential book for advanced undergraduate and postgraduate students working in the areas of applied linguistics, education, psychology, anthropology and communication.

**Critical Discourse Analysis**

Studies on discourse and language learning originated in the field of general education and they focused on first language learning environments. However, since 1980s research on discourse and language learning broadened the scope of investigation to resp

**An Introduction to Discourse Analysis**

Eva Alcón Soler Maria Pilar Safont Jordà Universitat Jaume I, Spain The main purpose of the present book is to broaden the scope of research on the development of intercultural communicative competence. Bearing this purpose in mind, English learners are considered as intercultural speakers who share their interest for engaging in real life communication. According to Byram and Fleming (1998), the intercultural speaker is someone with knowledge of one or more cultures and social identities, and who enjoys discovering and maintaining relationships with people from other cultural backgrounds, although s/he has not been formally trained for that purpose. Besides, possessing knowledge of at least two cultures is the case of many learners in bilingual or multilingual communities. In these contexts, the objective of language learning should then focus on developing intercultural competence, which in turn may involve promoting language diversity while encouraging English as both a means and an end of instruction (see Alcón, this volume). This is the idea underlying the volume, which further sustains Kramsch’s argument (1998) against the native/ non-native dichotomy. Following that author, we also believe that in a multilingual world where learners may belong to
more than one speech community, their main goal is not to become a native speaker of English, but to use this language as a tool for interaction among many other languages and cultures.

**Introducing Discourse Analysis in Class**

Concentration on the formal features of language and on developing speaking skills in a second language fails to provide the language student with the necessary level of conversational ability. The concept of communicative competence has resulted in a new emphasis on the nature of interaction and the rules of discourse. Interest has shifted from studies on language structure to studies on social interaction, the meaning of utterances, and the functions of speech. This paper explores how recent advances in sociolinguistics and discourse analysis can aid one's understanding of the roles and privileges of teachers and students engaged in verbal interaction and how verbal behavior can be changed or acquired for greater conversational competence. Areas discussed include: (1) natural discourse (speech acts, pragmatics, turn taking, moves, topic), (2) natural discourse and first and second language acquisition, (3) classroom discourse, and (4) practical applications (including exercises for developing skills for participating in debates and discussions). Excerpts from English, French, and German language conversations are cited throughout. The appendices present hesitation and expansion strategies in conversation and some conversational management strategies used by French and German native speakers. (JK)

**Discourse in English Language Education**

In this book Michael McCarthy and Ronald Carter describe the discoursal properties of language and demonstrate what insights this approach can offer to the student and teacher of language. The authors examine the relationship between complete texts, both spoken and written, and the social and cultural contexts in which they function. They argue that the functions of language are often best understood in a discoursal environment and that exploring language in context compels us to revise commonly-held understandings about the forms and meanings of language. In so doing, the authors argue the need for language teachers, syllabus planners and curriculum organisers to give greater attention to language as discourse.

**Discourse Analysis in Second Language Research**

Discourse and Language Education is part of the Cambridge Language Teaching Library series. Discourse analysis describes how such communication is structured, so that it is socially appropriate and linguistically accurate. This book gives practical experience in analyzing discourse and the study of written language. The analyses show the ways we use linguistic signals to carry out our discourse goals and the differences between written and spoken language as well as across languages. This text can be used as a manual in teacher education courses and linguistics and communications courses. It will be of great interest to second language teachers, foreign language teachers, and special education teachers (especially those involved with the hearing impaired).

**Corpus Perspectives on the Spoken Models used by EFL Teachers**

Routledge English Language Introductions cover core areas of language study and are one-stop resources for students. Assuming no prior knowledge, books in the series offer an accessible overview of the subject, with activities, study questions, sample analyses, commentaries and key readings - all in the same volume. The innovative and flexible 'two dimensional' structure is built around four sections - introduction, development, exploration and extension - which offer self-contained stages for study. Each topic can also be read across these sections, enabling the reader to build gradually on the knowledge gained. Each book in the series has a companion website with extra resources for teachers, lecturers and students. Discourse

Men and Masculinities in Global English Language Teaching

This book offers a model of classroom discourse analysis that uses systemic functional linguistic theory and associated genre theory to develop a view of classroom episodes as ‘curriculum genres’, some of which operate in turn as part of larger unities of work called ‘curriculum macrogenres’. Drawing on Bernstein’s work, Christie argues that two registers operate in pedagogic discourse: a regulative register, to do with the goals and directions of the discourse; and an instructional register, to do with the particular ‘content’ or knowledge at issue. Each can be shown to be realized in distinctive clusters of choices in the grammar. The operation of the regulative register determines the initiation, pacing, sequencing and evaluation of the overall pedagogic activity. The book sets out the its methodology in detail by reference to a number of classroom texts, and a range of school subjects. Overall, schools emerge as sites of symbolic control in a culture.

Discourse and Language Education

This book provides a comprehensive account of the discipline of Critical Discourse Analysis and demonstrates multiple linguistic methods through which it exposes and demystifies ideologies that are present in institutional discourse. The book enables readers to critique the complexities of the relationship between language and power to expose the ideological operation of discourse. Proceeding from a theoretical grounding for CDA in contemporary society, the book comprises analysis of a wide range of discourse examples, including the news media, political speeches, public service leaflets and social media. Readers are guided through a diverse range of models in CDA in order to scrutinise and assess the role of language in society and to consider and challenge the principles of powerful networks, institutions and organisations.

International Handbook of English Language Teaching

In this edited collection, authors from various academic, cultural, racial, linguistic, and personal backgrounds use critical discourse analysis as a conceptual framework and method to examine social inequities, identity issues, and linguistic discrimination faced by historically oppressed groups in schools and society. Language, Race, and Power in Schools unravels the ways and degrees to which these groups have faced and resisted oppression, and draws on critical discourse analysis to examine how multiple forms of oppression intersect. This volume interrogates areas of discrimination and injustice and discusses possibilities of developing coalitions and concerted efforts across the lines of diversity.

An Introduction to Critical Discourse Analysis in Education

Recommends that language teachers incorporate discourse and pragmatics in their teaching if they wish to implement a communicative approach in their classrooms. The authors show how a discourse perspective can enhance the teaching of traditional areas of linguistic knowledge and language skills.
**Language for Teaching Purposes**

Considerable progress has been made in the use of corpora for research purposes to describe language in use, and more recently, through a CA DS (corpus assisted discourse studies) approach, to identify the discourse features of specific text genres. While the potential benefits of working with corpora in the classroom have been recognised, there has been a lag in the promulgation of guidelines for carrying out meaningful corpus work with language learners and teachers in mind. The papers in this volume aim to make a contribution toward filling that gap by providing an in-depth account of innovative corpus work, most of which has actually been carried out with real learners in the classroom. Authors provide valuable insights into ways of structuring corpus work for specific target learners, as well as suggestions for resolving problematic issues that have arisen and avoiding errors that have been made with learners and in their own research and experimentation. The transparency and honesty with which they present their methodology and results, along with the successful techniques they have developed, constitute a step forward in defining good (and bad) practice in the use of corpora in learning.

**Classroom Discourse Analysis**

This book explores the use of online and face-to-face interactions in language teacher education (LTE) by assessing the formation and practices of a community of practice (CoP), and evaluating the roles discussions between student teachers and a peer tutor can play in terms of identity formation, articulating narratives, reflective practices, and maintaining affective relationships. The specific context within which this is embedded is a Teaching English to Speakers of Other Languages (TESOL) programme, often known as English Language Teaching (ELT), at a third-level Irish institution. The data drawn on come from student teachers on a master’s (MA) programme who interacted with a peer tutor (the researcher) via a number of modes (face-to-face and online). The approach to data analysis is a corpus-based discourse analytical one, which examines the linguistic features of student teacher and peer tutor talk; the features of CoP practices in the discourse; and how different modes of communication shape the nature of this discourse. Perceptive data from the student teachers is used to outline their reactions to the modes of communication and the activities they participated in.

**Intercultural Language Use and Language Learning**

Corpus Perspectives on the Spoken Models used by EFL Teachers illustrates the key principles and practical guidelines for the design and exploitation of corpora for classroom-based research. Focusing on the nature of the spoken English used by L2 teachers, which serves as an implicit target model for learners alongside the curriculum model, this book brings an innovative perspective to the ongoing academic debate concerning the models of spoken English that are taught today. Based on research carried out in the EFL classroom in Ireland, this book: explores issues and challenges that arise from the use of "non-standard" varieties of spoken English by teachers, alongside the use of Standard British English, and examines the controversies surrounding sociolinguistic approaches to the study of variation in spoken English; combines quantitative corpus linguistic investigations with qualitative functional discourse analytic approaches from pragmatics and SLA for classroom-based research; demonstrates the ways in which changing trends and perspectives surrounding spoken English may be filtering down to the classroom level. Drawing on a corpus of 60,000 words and highlighting strategies and techniques that can be applied by researchers and teachers to their own research context, this book is key reading for all pre- and in-service teachers of EFL as well as researchers in this field.

**Discourse Analysis and Language Teaching**

This volume gives intellectual space to a range of current perspectives on classroom discourse research and
provides a forum for conversations about the research process. Classroom discourse researchers from different theoretical perspectives provide five separate analyses of the same instructional unit in a high school biology class, using the same set of data. Interwoven with the five research reports are several conversations among the editors and researchers regarding specific aspects of the research process. These conversations illuminate some of the actual decisions that researchers make when looking at data and crafting their analyses. This book is intended for graduate students, researchers, and teacher educators across the fields of applied linguistics and education who are interested in studying classroom discourse and, more generally, language-in-use. With its focus on both the research process and the outcomes of research, as well as on the theory-method relationship, this book is relevant for courses in research methodology, language in education, applied linguistics, discourse analysis, language development, and multiculturalism in the classroom.

**A n Intercultural Approach to English Language Teaching**

**Beyond the Sentence**

This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English Language Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for effective English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and global in perspective with a range of fresh new voices in English language teaching research.

**Teaching Business Discourse**

This book is about Positioning Theory (Davies & Harré, 1990) and its potential applications in bilingual and multilingual contexts involving teachers, learners, speakers, and users of a second/foreign or additional language. By using Positioning Theory as a theoretical lens and analytical approach, the author illustrates how various social and poststructural concepts in applied linguistics and language teacher education, including identity, agency, language socialization, classroom participation, and intercultural communication, can be investigated and better understood. The book adds a new perspective to the growing body of multidisciplinary literature in the areas of L2 teacher education and classroom learning, and includes step-by-step guidelines for positioning analysis, insights and implications for classroom practice, as well as suggested directions for future research. It will be of particular interest to language teachers and teacher educators, as well as students and scholars of applied linguistics more broadly.

**The Research Process in Classroom Discourse Analysis**

This book provides a comprehensive introduction to the use of microethnographic discourse analysis for researching, theorizing, and reconceptualizing the uses of language and literacy in educational settings. The authors apply an ethnographic perspective to discourse analysis to emphasize how teachers and students use spoken and written language to construct knowledge, opportunities for learning, and social relationships. The authors demonstrate how microethnographic discourse analysis at different levels of scale can provide deeper understandings into the nuanced, complex social interactions and relationships that exist in and across educational contexts, including meaning-making, literacy practices, power relations, and the social construction of personhood. Each chapter offers philosophically and theoretically grounded principles for using microethnographic discourse analysis and example cases that reflect the principles presented.
Ideal for researchers, teacher educators, and teachers, this essential text on discourse analysis, language, and literacy provides a grounding to further examine critical questions challenging educators.

**Investigating English Discourse**

Intercultural language education has redefined the modern languages agenda in Europe and North America. Now intercultural learning is also beginning to impact on English Language Teaching. This accessible book introduces teachers of EFL to intercultural language education by describing its history and theoretical principles, and by giving examples of classroom tasks.

**Language as Discourse**

New Perspectives on Grammar Teaching in Second Language Classrooms brings together various approaches to the contextualized teaching of grammar and communicative skills as integrated components of second language instruction. Its purpose is to show from both theoretical and practical perspectives that grammar teaching can be made productive and useful in ESL and EFL classrooms. In this text: *First-rate scholars approach the teaching of grammar from multiple complementary perspectives, providing an original, comprehensive treatment of the topic. *Discourse analysis and research data are used to address such pedagogical areas as grammatical and lexical development in speaking, listening, reading, and writing. *The communicative perspective on ESL and EFL instruction that is presented provides ways for learners to enhance their production skills, whereas the meaning-based grammar instruction can supplement and strengthen current methodology with a communicative focus. This volume is intended as a foundational text for second language grammar pedagogy courses at the advanced undergraduate and master's levels.

**Positioning Theory in Applied Linguistics**

DA and language teaching The present thesis "Discourse analysis and language teaching: An Analysis of Vocabulary Diversity in the Transcripts of The Bold and the Beautiful and Its Practical Applications to Language Teaching" investigates the variety of soap opera vocabulary within the framework of discourse analysis. Based on theoretical sources and subjective observations it was assumed that many of the vocabulary items used in the series would be recycled in successive episodes. In order to verify the claim ten episodes were scrutinized resulting in a 20 000 word corpus that was divided into nouns, verbs, adjectives and adverbs. The corpus was compared against the Longman Corpus Network database that includes 3000 most commonly used word in English. It became evident that the majority of the vocabulary items belongs to the list therefore it may be claimed that the language level of the soap opera is not beyond an average English language learner. Based on the vocabulary of the ten episodes the author also suggests three different types of exercises that can be used in the English language classroom.

**Discourse and Language Learning Across L2 Instructional Settings**

How do we design sentences to fit their purposes and how do we combine them to communicate complex, contextualized meanings? This work takes discourse apart to show how it is organized and how it aids communication.

**Discourse in English Language Education**

The authors present a social linguistic/social interactional approach to the discourse analysis of classroom language and literacy events. Building on recent theories in interactional sociolinguistics, literary theory, social anthropology, critical discourse analysis, and the New Literacy Studies, they describe a microethnographic approach to discourse analysis that provides a reflexive and recursive research process.
that continually questions what counts as knowledge in and of the interactions among teachers and students. The approach combines attention to how people use language and other systems of communication in constructing classroom events with attention to social, cultural, and political processes. The focus of attention is on actual people acting and reacting to each other, creating and recreating the worlds in which they live. One contribution of the microethnographic approach is to highlight the conception of people as complex, multi-dimensional actors who together use what is given by culture, language, social, and economic capital to create new meanings, social relationships and possibilities, and to recreate culture and language. The approach presented by the authors does not separate methodological, theoretical, and epistemological issues. Instead, they argue that research always involves a dialectical relationship among the object of the research, the theoretical frameworks and methodologies driving the research, and the situations within which the research is being conducted. Discourse Analysis and the Study of Classroom Language and Literacy Events: A Microethnographic Perspective: introduces key constructs and the intellectual and disciplinary foundations of the microethnographic approach; addresses the use of this approach to gain insight into three often discussed issues in research on classroom literacy events--classroom literacy events as cultural action, the social construction of identity, and power relations in and through classroom literacy events; presents transcripts of classroom literacy events to illustrate how theoretical constructs, the research issue, the research site, methods, research techniques, and previous studies of discourse analysis come together to constitute a discourse analysis; and discusses the complexity of "locating" microethnographic discourse analysis studies within the field of literacy studies and within broader intellectual movements. This volume is of broad interest and will be widely welcomed by scholars and students in the field language and literacy studies, educational researchers focusing on analysis of classroom discourse, educational sociolinguists, and sociologists and anthropologists focusing on face-to-face interaction and language use.

Discourse Analysis in the Language Classroom: Students as Discourse Analysts/Language Researchers: The Spoken Language

New technologies are constantly transforming traditional notions of language use and literacy in online communication environments. While previous research has provided a foundation for understanding the use of new technologies in instructed second language environments, few studies have investigated new literacies and electronic discourse beyond the classroom setting. This volume seeks to address this gap by providing corpus-based and empirical studies of electronic discourse analyzing social and linguistic variation as well as communicative practices in chat, discussion forums, blogs, and podcasts. Several chapters also examine the assessment and integration of new literacies. This volume will serve as a valuable resource for researchers, teachers, and students interested in exploring electronic discourse and new literacies in language learning and teaching.

Using Corpora in Discourse Analysis

The demands of today’s society for greater specialization have brought about a profound transformation in the humanities, which are not immune to the competitive pressure to meet new challenges that are present in other sectors. Thus, lecturers and researchers in modern languages and applied linguistics departments have made great efforts to design syllabi and materials more attuned to the competences and requirements of potential working environments. At the same time, linguists have attempted to apply their expertise in wider areas, creating research institutes that focus on applying language and linguistics in different contexts and offering linguistic services to society as a whole. This book attempts to provide a global view of the multiple voices involved in interdisciplinary research and innovative proposals in teaching specialized languages while offering contributions that attempt to fill the demands of a varied scope of disciplines such as the sciences, professions, or educational settings. The chapters in this book are made up of current research on these themes: discourse analysis in academic and professional genres, specialized translation,
lexicology and terminology, and ICT research and teaching of specialized languages.
